COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

ISTANBUL, Sept. 8, 2026 /PRNewswire/ â?? Over more than three decades of international operations, RÃ¶nesans has completed over 1,000 projects in nearly 40 countries and generated USD 50 billion in international project revenue to date. Working alongside 3,500 Turkish manufacturers and subcontractors, the company also brings Turkish engineering expertise, production capacity, and services to markets around the world.

ENRâ??s ranking is based on revenue earned outside a companyâ??s home market, so it says more about a companyâ??s ability to win work and compete internationally than it does about overall size. Thatâ??s what makes RÃ¶nesansâ?? run here notable, the company has now held a top 50 spot for 11 straight years and continues to hold a strong position among European contractors too.

The achievement carries weight for RÃ¶nesans because its story started outside TÃ¼rkiye. The company built its name by expanding internationally and competing head-to-head with some of the worldâ??s largest firms, then brought that experience home to invest in TÃ¼rkiye. RÃ¶nesans first appeared in the ENR ranking in 2006, in 86th place.

To date, RÃ¶nesans has partnered with 3,000 manufacturers and 500 subcontractors based in TÃ¼rkiye on its international projects. Across its international operations, the company has employed 28,853 Turkish professionals, including 3,500 engineers and architects, and the total workforce involved in these projects has reached 271,888.

Dr. Erman IlÄ±cak on Eleven Years Among the Worldâ??s Top 50 International Contractors

Reflecting on RÃ¶nesansâ?? international journey of more than three decades, Dr. Erman IlÄ±cak, President Emeritus of RÃ¶nesans Holding, said,

â??Eleven years is a long time to hold your ground. In that period, the world changed more than once â?? we lived through a pandemic, wars broke out, an energy crisis hit, and financing conditions shifted under our feet. In every region we operate, from Europe to the Middle East, from the CIS countries to Africa, a new challenge came along almost every year.

â??In moments like that, deciding how to respond is key. Our teams adapted to each new situation, found solutions, changed course when they had to, and kept moving. Over the long run, what makes you strong is how you adapt together when the plan changes.

â??For 11 years, weâ??ve stayed among the worldâ??s top 50 international contractors. The world changed in that time, and we changed too. We moved into new countries, built new partnerships, and developed new capabilities. But we stayed consistent with our culture of collaboration and problem-solving.

â??Thereâ??s so much more depth behind the ranking. An incredibly capable team Iâ??m proud of has been pulling in the same direction across the globe â?? our engineers and architects, our finance professionals, our business partners. This is a large organization that has grown up together over the years. What RÃ¶nesans does well is act with the same mindset across different geographies and under different conditions.

â??Our USD 50 billion in international project experience, and 11 straight years on this list, leave us with an even bigger responsibility looking ahead. I want to thank every colleague at RÃ¶nesans around the world who takes ownership and helps us meet the new challenges each year brings.â?•

From Europeâ??s Tallest Building to the Netherlandsâ?? Longest Highway Tunnel

Since launching international operations in 1993, RÃ¶nesans has built a footprint spanning multiple regions worldwide. Its international portfolio includes some of the most complex engineering projects out there, among them the Lakhta Center, Europeâ??s tallest building, the Gotthard Base Tunnel beneath the Swiss Alps, the Gaasperdammertunnel in the Netherlands, the countryâ??s longest highway tunnel, and a natural gas to gasoline production plant in Turkmenistan.

TÃ¼rkiyeâ??s Invisible Export Power

The economic impact of RÃ¶nesansâ?? international work reaches well beyond the companyâ??s own project revenues. International contracting pulls in a wide value chain, engineering, architecture, finance, legal services, building materials, logistics, and technology. Through its work with more than 3,500 manufacturers and subcontractors based in TÃ¼rkiye, RÃ¶nesans has procured and exported over USD 2 billion worth of goods and services over the past decade alone.

This work gives Turkish companies a way into new markets, while giving Turkish engineers, architects, and managers real experience on some of the worldâ??s largest projects.

Continued Growth in Europe

Europe remains central to RÃ¶nesansâ?? international growth strategy. In 2009, the company acquired a 10% stake in the Austrian construction group PORR, one of its first major moves into Europe. That was followed by the acquisition of a subsidiary of the Alpine Bau Group in 2013, Germanyâ??s

established engineering firm Heitkamp in 2014, and Dutch construction company Ballast Nedam in 2015. After a thorough restructuring under RÃ¶nesans, Ballast Nedam returned to profitability within three years.
