COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

MUNICH, June 24, 2026 /PRNewswire/ â?? The global clean energy event of the year is here â?? and cutting-edge technologies are making their way to Europe! From June 23 to 25, 2026, Munich hosts Intersolar Europe, one of the worldâ??s premier flagship exhibitions for the renewable energy sector, bringing together the industryâ??s most advanced clean energy technologies and leading industrial players.

Jiangsu Zhongtian Technology (ZTT) makes a powerful return to Intersolar Europe (Booth C3.480), presenting its full-industry-chain core technologies spanning PV, energy storage, and hydrogen, complemented by mature system solutions and a proven global project track record. With customizable, highly reliable, and field-verified integrated â??New Energy+â?• solutions, ZTT showcases the end-to-end strength, while jointly exploring new pathways for the global low-carbon energy transition.

On the opening day of the exhibition, ZTT delivered five consecutive professional keynote presentations, covering five strategic areas: power infrastructure, PV microgrids, energy storage innovation, green hydrogen coupling, and ESG sustainable development. The sessions provided a comprehensive overview of the companyâ??s cutting-edge technological advances and real-world global deployment practices.

On-site, ZTT signed orders for commercial and industrial (C&I) energy storage cabinets with two Hungarian customers. By leveraging the channel and project resources of two local energy enterprises, the company is poised to rapidly roll out regional C&I energy storage projects, further strengthening its footprint in the local end-user market. This lays a solid foundation for subsequent batch deliveries and long-term in-depth collaboration, while steadily expanding the market share and influence in the regional energy storage sector.

Throughout the exhibition, ZTT has been executing a multi-pronged strategy across the European market, delivering tangible outcomes on multiple fronts:

The excitement continues! ZTT warmly invites global partners to visit Booth C3.480 and join us in shaping a low-carbon future.
