COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

JINHUA, China, April 20, 2026 /PRNewswire/ â?? On April 15, DMEGC Solar, a global leader in magnetic materials and renewable energy solutions, achieved a milestone breakthrough in sustainable development. With outstanding performance in environmental protection, social responsibility, and other key areas, the company earned a Gold Medal from the internationally recognized rating agency EcoVadis, scoring 82 points. This places DMEGC Solar in the top 3% of all rated companies worldwide, surpassing 97% of participants.

EcoVadis is a globally leading sustainability assessment platform, having rated over 150,000 companies across more than 250 industries and 185 countries. Its evaluation framework covers 21 indicators across four core themes: Environment, Labor & Human Rights, Ethics, and Sustainable Procurement. The platform aims to assess the sustainability performance and social responsibility of companies within global supply chains.

DMEGC Solar participated in the assessment at the group level rather than as a single factory, demonstrating outstanding strength across all four dimensions. In the Labor & Human Rights dimension, the company has established a comprehensive employee rights protection system, strictly implemented occupational health and safety standards, and promoted employee development and career growth, ranking in the top 1% of its industry.

In the Sustainable Procurement dimension, the company has built a full-chain green supply chain management mechanism, collaborating with core suppliers to create a â??cooperative carbon reductionâ?• ecosystem. Initiatives such as packaging material recycling, green electricity usage, and localized collaborative production have enabled a low-carbon, traceable supply chain, also ranking in the top 1% of the industry.

Coupled with strong performances in environmental governance and business ethics, the company achieved an impressive score of 82, surpassing 97% of evaluated companies and earning the Gold

Medal. This distinction places DMEGC Solar at the top in the global solar module manufacturers to receive such recognition.

This Gold Medal rating will for sure strengthen the companyâ??s competitiveness in overseas markets. On one hand, its industry-leading ESG performance helps meet policy requirements related to sustainable supply chains, enhancing both the premium pricing of its products in international markets and its ability to secure orders. On the other hand, this recognition will boost customer and partner trust in the companyâ??s brand, supporting the expansion of market share for its core productsâ??such as photovoltaic modules, residential energy storage systems, and magnetic materialsâ??while consolidating its market leadership.
