COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

TAIPEI, May 27, 2026/PRNewswire/ â?? Infortrend Technology, Inc. (TWSE: 2495), a leading provider of enterprise storage and AI solutions, today announced it will unveil next-generation infrastructure at COMPUTEX Taipei to power AI and data-intensive workloads from the intelligent edge to the enterprise cloud.

From June 2â??5, at Booth J0306, Infortrend will present integrated solutions designed to simplify deployment, maximize compute and storage performance, and optimize GPU utilization. The showcase highlights infrastructure spanning the full spectrum of AI and enterprise workloads:

Edge Computing for Distributed Environments

Private Cloud for Data Centers

High-Performance Storage for AI and HPC

â??Intelligence is no longer a capability reserved for the data centerâ??it is moving to every factory floor, every retail store, every intersection, and every hospital. The organizations that will lead the next decade are those who can deploy AI seamlessly at every point in the network, from a single edge node at a remote site to a multi-petabyte enterprise cluster. At Infortrend, our mission is to make that vision a reality by delivering infrastructure that is as intelligent as the workloads it runs. At COMPUTEX, we invite the world to see what that future looks like today,â?• said Frank Lee, Senior Director of Product Planning at Infortrend.

Visit Infortrend at COMPUTEX to explore AI, HPC, enterprise IT, and media post-production use cases, with live demonstrations illustrating how Infortrend solutions drive performance and efficiency at every layer of the infrastructure stack.

About Infortrend

Infortrend (TWSE: 2495) has been developing and manufacturing storage solutions since 1993. With a strong emphasis on in-house design, testing, and manufacturing, Infortrend storage delivers performance and scalability with the latest standards, user-friendly data services, personal after-sales support, and unrivaled value.
