As part of the monthly rebalancing, Polkadot is excluded from the index and replaced by BNB.The performance of the Virtune Crypto Altcoin Index ETP for January was -14.62%.

The rebalancing is carried out according to the index that the ETP tracks, the Virtune Crypto Altcoin Index. The purpose of the monthly rebalancing is to reset the weights of each crypto asset to provide equal-weighted exposure to altcoins.

Virtune Crypto Altcoin Index ETP is the first of its kind in the Nordic region. It includes up to 10 leading alternative crypto assets (altcoins), excluding Bitcoin and Ethereum. Each altcoin is equally weighted to promote diversification; this structure allows investors to gain broad exposure to crypto assets beyond Bitcoin and Ethereum without being heavily concentrated in any single crypto asset.
