COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

New platform eliminates scheduling friction through conversational AI assistants that work on your domain

FT LAUDERDALE, Fla., Feb. 10, 2026 /PRNewswire/ â?? IgniteTech, the enterprise software powerhouse known for leading the AI transformation revolution, today announced Adminioâ?¢ AI, a groundbreaking, patent-pending platform that eliminates the tedious back-and-forth of meeting coordination through intelligent, persona-based AI assistants. Building on the proven technology foundation of IgniteTechâ??s EloquensÂ® AI and MyPersonasÂ® platforms, Adminio AI advances the companyâ??s vision of putting powerful AI capabilities in the hands of business professionals. The announcement was made at GenAI Expo during IgniteTechâ??s keynote address kicking off the event held in Ft. Lauderdale, Florida, where IgniteTech serves as Presenting Sponsor.

â??Scheduling meetings consumes valuable hours every week that could be spent on actual work,â?• said Eric Vaughan, CEO of IgniteTech. â??The data is staggering: professionals waste 3 hours per week managing calendars, thatâ??s 7.5% of work time just coordinating schedules. Poor scheduling costs businesses $100 billion annually in lost productivity, translating to $25,000 per employee per year. With Adminio AI, weâ??re giving every professional their own AI executive assistant that works entirely through email. Just CC your Adminio AI assistant on any scheduling request and they handle everything: checking calendars, coordinating time zones, negotiating times, and confirming meetings. No booking links. No friction. Just booked time,â?• added Vaughan.

Adminio AI operates as a named persona â?? like a real executive assistant â?? that users interact with conversationally via email. Each user gives their Adminio AI assistant a name and CCâ??s them on scheduling requests, just as they would a human EA. The platform works on the customerâ??s own domain, ensuring seamless brand integration and eliminating the friction of external email addresses. The AI handles multi-party coordination across time zones, manages calendar conflicts, and maintains context throughout complex negotiations. When situations require higher-touch coordination or human

judgment, Adminio AI automatically brings the designated human manager into the conversation via CC, ensuring critical decisions always have human oversight. This â??Human-In-The-Loopâ?• facility is a hallmark of all IgniteTechâ??s enterprise-grade AI innovations.

Built on IgniteTechâ??s patent-pending AI technology from Eloquens AI, Adminio AI delivers enterprise-grade capabilities from day one. The platform offers comprehensive integration with Microsoft 365, Google Gmail and GFIâ??s KerioConnectÂ®, making it accessible to organizations of all sizes regardless of their email infrastructure.

Key features include:

The platform emerged from IgniteTechâ??s own AI internal effort to reduce the significant executive and administrative time consumed by traditional scheduling. The companyâ??s widely documented AI-first workforce evolution, which saw over 80% of staff replaced due to resistance to AI adoption, including Vaughanâ??s own chief of staff, created the urgent need for an AI scheduling solution. â??When I had a gap with someone in that role, I realized every professional faces this same challenge,â?• said Vaughan. â??Most people donâ??t have the luxury of an executive assistant, and those who do are increasingly finding that traditional approaches canâ??t keep pace with global, distributed teams that need 24Ã?7 and multi-lingual capabilities.â?• Early internal deployment demonstrated dramatic efficiency gains, with people reclaiming many hours per week previously lost to calendar coordination.

Adminio AI will launch in Q1 2026 in three editions to suit different organizational needs:

Each edition scales features like meeting volume, calendar integrations and number of managed relationships to match organizational requirements.

Be among the first to experience Adminio AI when it launches. Visit adminio.ai to sign up for early access and watch the product demo video.

About IgniteTechFounded in 2010, IgniteTech is a leading AI-first enterprise software company.
