COMUNICATO STAMPA - CONTENUTO PROMOZIONALE

SHENZHEN, China, March 3, 2026 /PRNewswire/ - Smart wearables maker Mibro is entering the U.S. market with two sports-focused smartwatches, bringing with it a track record built alongside athletes and sports clubs in Europe.

The U.S. launch marks Mibro's biggest step yet in its global expansion, as the brand targets American athletes, outdoor enthusiasts and everyday fitness users under its tagline: "Live Smart, Go Active."

Founded in 2015, Mibro employs more than 500 R&D staff united by a single idea: smart wearables should help people improve, not just log metrics. Its products put that idea into practice, combining thoughtful design with advanced sports-tracking algorithms and elite-spec hardware. The result: everyday companions built to keep up with the people who wear them.

The approach has cultivated a global user base of 4.2 million, particularly across Europe, where the brand works with top-tier clubs and individual athletes to develop and validate its technology in real-world training and outdoor conditions.

In padel, the fast-growing racquet sport sweeping the continent, Mibro's AI-driven analysis helps competitive players identify weaknesses and refine technique by recognizing six distinct stroke types with 92.2% recognition accuracy. Developed and validated through real matches, real courts and real players across Spain and France, the technology has been adopted by professional and amateur clubs in both countries.

That proven ability to turn raw performance data into practical coaching insight now underpins the two products leading the U.S. launch:

Both products carry the same promise the brand has delivered to millions worldwide: helping people stay active and celebrate every step forward. They are available now through Mibro's official website and Amazon official store.

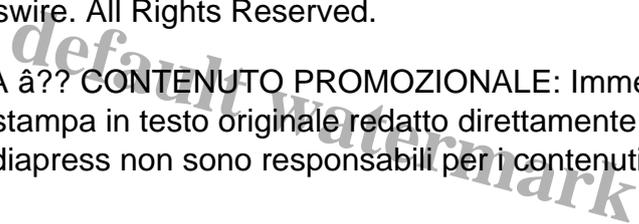

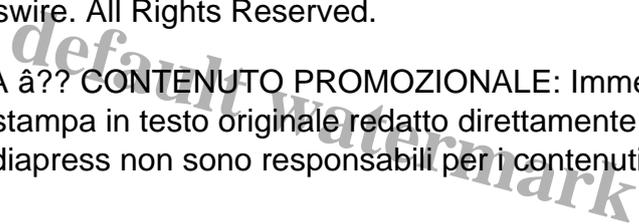

About Mibro

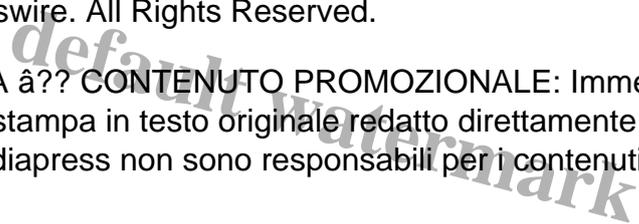

Mibro is a smart wearables brand built for sports and outdoor exploration. Headquartered in Shanghai with a global sales center in Shenzhen, the brand develops smart, reliable and user-friendly devices designed to help people push their limits.
