COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

With Hyland Intelligent MedRecords and Hyland Intelligent Correspondence for Revenue Cycle, healthcare organizations can reduce administrative burden, accelerate access to critical information, and improve financial outcomes

CLEVELAND, March 4, 2026 /PRNewswire/ â?? As healthcare organizations race to redesign operations with AIâ??driven, workflowâ??embedded intelligence that eases clinician burden and strengthens financial performance, they are urgently seeking practical tools that turn data into action at the point of work. In response, Hyland, the pioneer of the Content Innovation Cloudâ?¢, is unveiling Hyland Intelligent MedRecords and Hyland Intelligent Correspondence for Revenue Cycle. These new solutions harness the power of generative AI to deliver unprecedented efficiency and accuracy across health information management and revenue cycle workflows.

â??Hyland has a long history of pioneering advancements in automation, and weâ??re now setting a new standard for AI-driven innovation in healthcare,â?• said Michael Campbell, chief product officer at Hyland. â??Building on the success of our proven, trusted foundational product offerings, these new capabilities on the Content Innovation Cloud are enabling healthcare teams to unlock value from their unstructured data, streamline highâ??friction workflows, and deliver meaningful business outcomes.â?•

Intelligent MedRecords: Revolutionizing Clinical Data Access

Hyland Intelligent MedRecords is designed to help healthcare systems overcome the inefficiencies and costs tied to manual medical record processing. By leveraging AI-powered document capture, classification, and intelligent data extraction, the solution streamlines workflows, improves data accuracy, and enhances both clinician and health information management (HIM) team experiences. It transforms how medical records are handled, reducing bottlenecks, minimizing errors, and accelerating access to critical patient information.

Key Benefits:

â??Hyland Intelligent MedRecords and Intelligent Correspondence for Revenue Cycle will be gameâ??changers for our organization, automating medical record capture and classification, reducing manual work, eliminating bottlenecks, delivering accurate information to clinicians faster,â?• said Julie Barnett, vice president of enterprise business solutions at OU Health. â??By starting with medical records and billing correspondence, weâ??re reducing friction today while laying the foundation for broader AI adoption across OU Health.â?•

Intelligent Correspondence for Revenue Cycle: Optimizing Financial Workflows

Hyland Intelligent Correspondence for Revenue Cycle streamlines the intake and processing of revenue cycle documents, such as faxes, lockbox files, and emails, using AI automation. By eliminating manual tasks and accelerating data extraction, this solution helps healthcare organizations reduce operational costs, improve data accuracy, and enhance staff and patient experiences. Itâ??s a smarter, faster way to manage financial correspondence and drive better reimbursement outcomes.

Key Benefits:

â??Healthcare organizations are increasingly utilizing AI-driven automation, where AI doesnâ??t just analyze data, but is actively assisting in orchestrating workflows across operational, administrative, and supervised clinical domains,â?• said Mutaz Shegewi, senior research director, worldwide healthcare provider AI, platforms and technologies at IDC. â??This kind of healthcare transformation depends on unified platforms that bring together trusted data, intelligent content services, and governed AI, integrated across enterprise systems, to operate at scale within regulatory and safety constraints.â?•

Both solutions feature a GenAI prompt-based interface that simplifies automation design and accelerates deployment, helping healthcare organizations scale automation with limited IT resources. Running on Hylandâ??s AIâ??native Content Innovation Cloud, these solutions immediately benefit from builtâ??in intelligence and provide a strong foundation for increasingly contextâ??aware automation across clinical and financial workflows.
