COMUNICATO STAMPA - CONTENUTO PROMOZIONALE

HANGZHOU, China, April 15, 2026 /PRNewswire/ - Dahua Technology, a world-leading video-centric AIoT solution and service provider, today announced the launch of WizColor 2.0, the latest upgrade to its low-light monitoring solutions. Featuring the newly introduced WizColor X, the solution delivers enhanced clarity, improved color accuracy, and more intelligent performance in challenging lighting conditions.

WizColor X: Next-Generation Low-Light Monitoring

At the core of WizColor 2.0 is WizColor X, designed to significantly improve light sensitivity and deliver richer color layers and finer details in low-light environments. It also enhances the capture and recognition of moving subjects, effectively reducing motion blur.

Key features include:

In addition, the WizColor X TiOC PROX Series incorporates Optical Path Correction (OPC) technology to optimize light refraction for improved clarity. A dual-microphone array combined with VoiceCatcher technology further enhances audio performance by reducing background noise and extending pickup range.

Driving the Future of Intelligent Monitoring

WizColor 2.0 represents a further step in improving full-color imaging under low-light conditions, said Beryl Bai, Product Manager at Dahua Technology. By combining advanced optics, AI-powered image processing, and practical deployment design, we are helping customers achieve more reliable and efficient monitoring in real-world scenarios.

Designed for a wide range of environments including factories, farms, parking lots, fish ponds, and residential courtyards - WizColor 2.0 balances performance with ease of deployment.

By integrating advanced imaging algorithms, innovative optical design, and application-oriented features, Dahua continues to deliver comprehensive solutions that meet evolving industry demands. WizColor 2.0 enhances visibility and accuracy while supporting safer, more efficient, and more resilient operations.
