New Addition to A-Series Delivers 105% More Build Volume Than Standard Machines, Targeting Home Decor Enthusiasts, Families, Cosplayers and Print Farms

AUSTIN, Texas, June 1, 2026 /PRNewswire/ - Bambu Lab today announced the launch of the A2L, a large-format 3D printer designed for ambitious creative projects that previously required splitting large models into multiple pieces. The A2L represents a new category within the Bambu ecosystem - the printer that brings professional-tier capabilities to a significantly more accessible price point while maintaining the user-friendly experience the A-Series is known for.

A Bigger Stage for Bigger Ideas

The A2L features a 330 x 320 x 325 mm build volume, providing 105% more printing volume than standard 256 mm-class machines. This expanded capacity enables users to print cosplay prop components without splitting and gluing, produce large batches of home décor items in a single run, and give children creative freedom that was previously impossible.

Anyone familiar with the H2S series will recognize the philosophy behind the A2L. It is essentially an H2S Lite - a machine that brings key solutions from the professional tier into an entirely different, significantly lower price segment. Without compromising where it truly matters.

Advanced Technology for Professional Results

The A2L integrates several advanced features previously reserved for higher-end models:

Modularity That Changes the Rules

The A2L introduces a dedicated mounting point for expansion modules. The Blade Cutting Upgrade Kit - including a cutting module, pen module, cutting mat, and accessories - transforms the printer into a precision cutter for stickers, leather, and fabrics, as well as a drawing plotter.

Note: The A2L does not support laser modules due to safety considerations related to its open-frame construction.

Camera-assisted alignment in Bambu Handy and an upcoming OTA update featuring Print-then-Cut functionality demonstrate Bambu's commitment to treating 2D capabilities as a genuine extension of the creative workshop.

Target Audiences

The A2L is designed for:

Pricing and Availability

A2L:

US: 469 USD (excl. tax / incl. shipping) EU: 379 EUR (incl. tax / excl. shipping)

A2L Combo (AMS Lite):

US: 569 USD (excl. tax / incl. shipping) EU: 489 EUR (incl. tax / excl. shipping)

The A2L/A2L Combo is available globally starting June 1, 2026 at Bambu Lab official website (June 2, 2026 for Japan and Korea).

Technical Specification

About Bambu Lab

Bambu Lab is a consumer-tech company focusing on desktop 3D printers. Its state-of-the-art 3D printers offer a feature-rich first-class experience for a global community of 3D printing makers, aiming to break the barriers between the digital and physical worlds and bring creativity to a whole new level. Bambu Lab sells its 3D printers, filaments, and accessories on its official website, serving customers across 30+ countries.
