COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

DUBLIN, Nov. 3, 2026 /PRNewswire/ â?? BOC Group, a global provider of enterprise modeling software, has once again been named a Leader in the GartnerÂ® Magic Quadrantâ?¢ for Enterprise Architecture ToolsÂ¹. This marks the companyâ??s sixth consecutive recognition and underscores the continued momentum of ADOIT EA suite as organizations navigating AI-driven transformation.

ADOIT helps architecture teams turn static documentation into a living, connected repository that supports real decision-making. Guided workspaces and simple forms make architecture data easier to contribute, review and use across the organization â?? freeing specialists to focus on higher-value work rather than data entry.

A key part of this evolution is AI embedded directly into everyday architecture work. ADOIT helps teams interact with architecture knowledge in natural language, identify dependencies and technology risks, and move faster from enterprise data to actionable insight â?? while keeping trusted architecture context at the center.

â??Being recognized as a Leader for six consecutive years is something we are incredibly proud of,â?• says Christoph Moser, ADOIT Product Manager. â??As AI reshapes the enterprise, organizations need a clear understanding of their technology, dependencies and the impact of change. Our focus with ADOIT is to give architects that context â?? and the tools to turn it into confident action.â?•

More information about BOC Group and ADOIT is available on the ADOIT website.
