COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

In the news release, Verda and Compal Expand Global AI Infrastructure Collaboration at GTC Berlin 2026, issued 21-Oct-2026 by Compal Electronics, Inc. over PR Newswire, we are advised by the company that changes have been made. The complete, corrected release follows, with additional details at the end:

Verda and Compal Expand Global AI Infrastructure Collaboration at GTC Berlin 2026

Compalâ??s expanding manufacturing footprint and NVIDIA HGX B300-based infrastructure support Verdaâ??s growing AI cloud deployment across global markets

BERLIN, Oct. 21, 2026 /PRNewswire/ â?? Verda and Compal Electronics (Compal; TWSE: 2324) are expanding their collaboration to support Verdaâ??s rapidly growing AI infrastructure footprint, combining Verdaâ??s AI cloud expertise with Compalâ??s expanding global manufacturing capabilities and advanced AI server engineering. The companies will highlight their collaboration at GTC Berlin 2026, as demand for AI computing continues to accelerate across Europe and global markets.

As Verda expands its AI cloud capacity, the ability to deploy infrastructure quickly and efficiently across regions is becoming increasingly critical. Compal continues to invest in expanding its manufacturing footprint, including additional capacity in Daxi, Taiwan and the United States, strengthening its ability to support customers closer to where AI infrastructure is deployed.

This global footprint provides an important advantage for Verdaâ??s expansion strategy. U.S. deployments can be supported through local manufacturing in the United States, while Compalâ??s expanded Daxi capacity can support Verdaâ??s growth across EMEA and Asia, helping improve deployment flexibility, supply resilience, and speed as Verda scales its AI infrastructure globally.

Scaling Together: From Advanced Computing to Global Deployment

The Verdaâ??Compal collaboration brings together complementary strengths across the AI infrastructure lifecycle. Verda brings expertise in GPU cloud infrastructure, deployment, and operations, transforming advanced computing capacity into scalable AI cloud services. Compal provides the engineering, manufacturing scale, and global production footprint required to turn the latest accelerated computing technologies into deployment-ready infrastructure.

Together, the companies are creating a more agile path from NVIDIA accelerated computing technology to production AI environmentsâ??helping Verda expand capacity faster while maintaining the infrastructure reliability and scalability required for global growth.

Supporting this next phase is Compalâ??s SGX30-2, based on NVIDIA HGX
B300
system
s with eight NVIDIA Blackwell Ultra GPUs. Designed for high-density AI workloads, the platform provides a next-generation computing foundation for Verdaâ??s expanding AI infrastructure.

â??Our goal is to empower frontier AI teams across the globe with the compute they need, and the next two years will be pivotal as we ramp up our business to meet growing demand. Working with Compal allows us to scale our operations quickly and reliably,â?• said Arturs Polis, CTO at Verda.

Alan Chang, Vice President, Infrastructure Solutions Business Group (ISBG) at Compal, said:â?•Our investment in global manufacturing is designed to support customers as AI infrastructure moves from rapid innovation to deployment at scale. By combining Compalâ??s engineering and manufacturing footprint with Verdaâ??s AI cloud and operational expertise, we can respond more quickly to regional demand and accelerate the deployment of next-generation AI infrastructure.â?•

Advancing the Partnership at GTC Berlin 2026

GTC Berlin 2026 marks the next chapter of the Verdaâ??Compal collaboration, bringing their shared vision for scalable AI infrastructure to Europeâ??s growing AI ecosystem. The companies will engage with customers and technology partners on how advanced computing, regional manufacturing, and cloud operations can work together to accelerate AI deployment worldwide.

Visitors can learn more about the Verda Ã? Compal collaboration at the Verda booth, 3059, during GTC Berlin 2026.

About Verda

Verda is a technology company building the next generation of cloud infrastructure for AI â?? compute thatâ??s instant, on-demand and at scale. Headquartered in Helsinki, the company operates globally across Europe, the US and Asia. Verda employs around 250 people from over 40 nationalities and has raised over $450M in total funding from investors including Emergence Capital, MUFG Innovation Partners, Supermicro, Lifeline Ventures, ENDUR, 6 Degrees Capital (6DC), byFounders, J12 Ventures, Skaala, Varma and Tesi, alongside leading financial institutions. https://verda.com

About Compal

Established in 1984, Compal has grown into a leading global manufacturer of computers and smart devices, partnering with top-tier brands worldwide. Compal was recognized by CommonWealth Magazine as one of Taiwanâ??s top 7 manufacturers and has consistently ranked among the Forbes Global 2000 companies. Compal has actively expanded into new growth areas, including cloud servers, automotive electronics, smart medical and healthcare, and advanced communication solutions. Headquartered in Taipei, Taiwan, Compal operates design and production facilities in the United States, Taiwan, China, Vietnam, Mexico, Brazil, and Poland. Learn more at https://www.compal.com

Correction: An earlier version of this release incorrectly included a quotation from Jorge Santos, Chief Operating Officer at Verda. The quotation has since been corrected and replaced with the quotation from Arturs Polis, CTO at Verda.
