COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

In the news release, ZOE Energy Storage Partners with Local Saudi Ally to Build Kingdomâ??s First World-Class Battery Storage Manufacturing Base, issued 25-May-2026 by ZOE Energy Storage over PR Newswire, we are advised by the company that the joint venture partner should be ZOE Plus Energy Solutions Hungary (a joint venture between ZOE Energy Storage and Energy Pro Hungary). The complete, corrected release follows:

RIYADH, Saudi Arabia, May 25, 2026 /PRNewswire/ â?? ZOE Plus Energy Solutions Hungary, a joint venture between ZOE Energy Storage and Energy Pro Hungary, has partnered with a private Saudi business group to build the countryâ??s first world-class battery energy storage system manufacturing facility. The project combines ZOEâ??s advanced ESS technology, Energy Proâ??s European engineering and manufacturing expertise with local production, directly supporting Saudi Vision 2030 and reshaping the clean energy landscape in the Middle East and beyond.

The facility will be built in two phases: Phase I (6GWh) is set to begin production in Q1 2027. Phase II will expand capacity to 18GWh, filling a major gap in large-scale storage localization and ending the Kingdomâ??s dependence on imports. Once operational, the base will help Saudi Arabia meet its targets of 130GW of renewables, 48GWh of storage, and 50% clean power generation, accelerating its shift from a traditional energy giant to a global clean energy equipment hub.

The 150â??acre facility will meet top European manufacturing standards and earn â??Made in Saudiâ?• certification, fully complying with local grid codes. It will serve the Gulf region, the Middle East, North Africa, Central Asia, and Africa. A Green Energy Academy will be set up on site to train certified talent, ensuring deep localization of core expertise.

Following our manufacturing base in Hungary, this project is ZOEâ??s second overseas production hub â?? a cornerstone of our global strategy that blends ZOE technology, local manufacturing, and global service. Designed for extreme desert climates, it delivers tailored storage solutions and sets a benchmark for similar regions worldwide.

Mr. Huang Jun, Chairman of ZOE Energy Group, said: â??The Middle East is a key engine of global energy transformation. This manufacturing base is a decisive step in our global strategy.â?• He added that ZOE will continue to offer cuttingâ??edge technology, uncompromising quality, and fullâ??chain service to the regionâ??s green transition, coâ??building a new energy storage ecosystem.

This partnership marks a major advance for ZOE in the global energy transition â?? supporting Saudi Arabiaâ??s push for storage selfâ??reliance and adding fresh momentum to regional green growth and the worldâ??s lowâ??carbon future.
