COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

BARCELONA, Spain, March 6, 2026 /PRNewswire/ â?? MWC Barcelona 2026 concluded with a clear mandate for the global technology sector: the industry is shifting away from conversational AI toward Agentic AIâ??systems built for execution and proven ROI. Coinciding with this shift, Dyna.Ai announced earlier this week the closing of an eight-figure (USD) Series A funding round led by Singapore-based Lion X Ventures.

The round includes participation from Taiwan-listed technology company ADATA, a Korean financial institution, and industry veterans. This backing validates Dyna.Aiâ??s Result-as-a-Service (RaaS) approach as the answer to the â??Flight to Realityâ?• observed at the event, confirming a market shift toward accountable business outcomes over experimental tech.

The focus on accountability stems from a widening â??Action Gapâ?• between AIâ??s conversational ability and its capacity to perform real business tasks. Bridging this gap, Dyna.Aiâ??s showcase at MWC (Booth CS91) of its RaaS model emerged as a standout development, challenging the traditional SaaS status quo by aligning technology costs with business KPIs.

â??What we witnessed this week in Spain was a â??Flight to Realityâ??,â?• said Tomas Skoumal, Chairman and Co-Founder of Dyna.Ai. â??The executives we spoke with are no longer asking for AI that can pass a test; they are demanding AI that can resolve a service outage, close a sale, or streamline an internal operational process. We are seeing a fundamental pivot toward Agentic Applications that operate at the core of the business. By providing agents that manage both external AI Contact Center interactions and internal Employee Experience, we are helping enterprises reclaim their AI investments and turn them into sustainable competitive advantages.â?•

Key Strategic Shifts Observed at MWC 2026

Following the strong reception at MWC, Dyna.Ai is building stronger ties in the finance sector and contact centers across the European market. By anchoring AI in accountability, Dyna.Ai proves it is a high-yield asset rather than a technical experiment.

About Dyna.Ai

Dyna.Ai is a leading AI-as-a-Service company headquartered in Singapore, delivering enterprise-grade AI solutions that turn advanced AI into measurable business results. The company provides AI-powered products and services that enhance customer experience (CX), improve employee experience (EX), and optimize core business operations, with solutions designed for practical enterprise deployment. With a global presence across Asia, the Middle East, and the Americas, Dyna.Ai powers financial institutions, contact centers, and more enterprises worldwide.
