

Huawei and Qualcomm Announce Broad Patent License Agreement

Descrizione

COMUNICATO STAMPA • CONTENUTO PROMOZIONALE

SHENZHEN, CHINA • Media OutReach Newswire • 5 October 2026 • Huawei and Qualcomm today announced a multi-year, broad patent license agreement that includes cross licenses to the companies' patent portfolios across a range of technology fields, including 5G, compute, AI, and networking, together with Qualcomm's purchase of certain Huawei U.S. patents in the areas of compute, AI, networking, and other technologies. This transaction will close following receipt of the necessary regulatory approvals. The agreement reflects the companies' shared commitment to intellectual property rights and to licensing practices consistent with fair, reasonable and non-discriminatory (FRAND) principles.

• Huawei's decades of sustained investment in fundamental R&D have driven innovation and progress in mobile communications and other technology fields. Huawei's broad contributions to the 4G/5G standards, such as the near-physical-limit signal transmission technology using polar codes, have established Huawei's leadership in the mobile communications industry, and continuously transformed the way people communicate and live, • said Alan Fan, Huawei's Chief Intellectual Property Officer. • This agreement not only demonstrates the value of Huawei's innovations, but also recognizes Qualcomm's foundational contributions to modern communication technologies. •

• Qualcomm has invested in foundational wireless technologies that have enabled successive generations of mobile innovation and earned broad recognition across the global wireless industry. This agreement reaffirms industry recognition of Qualcomm's 5G technology leadership and the success of Qualcomm's 5G SEP licensing program, • said John Han, Executive Vice President and General Manager of Qualcomm Technology Licensing. • This agreement likewise reflects Qualcomm's recognition of Huawei's continued innovation and intellectual property in 5G and other technology fields. •

About Qualcomm

Qualcomm is a global computing leader at the center of the AI era, enabling intelligence to scale from the most personal devices to large-scale infrastructure. Building on more than four decades of innovation, we develop platforms and solutions that bring together advanced AI, high-performance low power computing, and industry-leading connectivity powering products and services used around the world. At Qualcomm, we are engineering human progress.

Qualcomm Incorporated includes our licensing business, QTL, and the vast majority of our patent portfolio. Qualcomm Technologies, Inc., a subsidiary of Qualcomm Incorporated, operates, along with its subsidiaries, substantially all of our engineering and research and development functions and substantially all of our products and services businesses, including our QCT semiconductor business. Snapdragon and Qualcomm branded products are products of Qualcomm Technologies, Inc. and/or its subsidiaries. Qualcomm patents are licensed by Qualcomm Incorporated. Qualcomm, Snapdragon, Qualcomm Dragonwing and Qualcomm Dragonfly are trademarks or registered trademarks of Qualcomm Incorporated.
