

Mammotome Launches First In-Room MR Vacuum-Assisted Breast Biopsy System

Descrizione

COMUNICATO STAMPA - CONTENUTO PROMOZIONALE

HAMBURG, Germany, Feb. 18, 2026 /PRNewswire/ - Mammotome, a Danaher company, announces the Mammotome Prima MR Dual Vacuum-Assisted Breast Biopsy System, the industry's first system designed to be positioned in the MRI scanner room, at the patient's side during a breast biopsy procedure. This breakthrough innovation enhances clinician coordination, improves communication, and keeps the focus on patient care by bringing the vacuum-assisted breast biopsy device directly into the room.

The Mammotome Prima MR system streamlines workflow with an intuitive in-room design¹. Clinicians benefit from larger tissue samples² enabled by stronger vacuum³ and an 8-gauge needle. This is made possible by 75% less tubing compared to other systems⁴. Less tubing also results in faster setup and cleanup and less biohazard waste. Additional highlights include convenient aperture size and vacuum strength adjustments on a touchscreen interface.

Ultimately, these combined benefits ensure clinicians can focus on delivering safe, accurate, and compassionate care, translating into a better experience for patients. "Our commitment to advancing breast care drives every innovation we bring to market," said Scott Treml, Mammotome Vice President and General Manager. "As the first of its kind in-room solution, the Mammotome Prima MR system empowers clinicians with greater efficiency and confidence, ultimately improving the patient experience."

The Mammotome Prima MR system has secured CE mark, and first cases are underway in select European countries. The system will be making its debut at the European Society of Radiology (ECR) Congress in March. Mammotome will be expanding access in select global markets throughout 2026. To learn more, please visit the Mammotome website.

About Mammotome

At Mammotome, our expertise and compassion for breast care makes us the indispensable partner to physicians, clinicians and patients. Our drive for innovation is rivaled only by our compassion for the people we serve, from the clinicians and surgeons who demand consistently precise solutions, to the patients and families seeking peace of mind. We boast a comprehensive range of products that create better outcomes in breast care and provide physicians and patients with educational resources that guide their journey. Headquartered in Cincinnati, OH, Mammotome has been part of the Danaher Corporation since 2014. The Mammotome brand of products is sold in over 45 different countries throughout the world.
