

New Veeva Study Builder Agent to Configure Clinical Studies in as Little as One Day

Descrizione

COMUNICATO STAMPA - CONTENUTO PROMOZIONALE

Standards-first agent delivers faster and more consistent EDC and DQS builds

PLEASANTON, Calif., Sept. 24, 2026 /PRNewswire/ - Veeva Systems (NYSE: VEEV) today announced Veeva Study Builder Agent, a new AI solution that configures Veeva EDC and Veeva DQS (Data Quality System) directly from a study protocol. By reusing an organization's existing standards and leveraging the CDISC Unified Study Definitions Model (USDM), the agent ensures faster, more deterministic study builds.

Study Builder Agent configures EDC forms, visits, and edit check rules, as well as CQL-based listings in DQS. It also automates testing, including the generation of test data. Because the agent builds from the organization's existing standards and follows a coordinated process, the results minimize deviation from standards and are audit-ready by design.

"Veeva Study Builder Agent will make it much faster to build high-quality studies," said Drew Garty, chief technology officer, Veeva Clinical Data. "We're committed to innovations that simplify, standardize, and connect clinical trials, and Study Builder Agent is a significant step toward achieving that vision."

Planned for early adopter availability in December 2026, Veeva Study Builder Agent is part of EDC and requires no additional license. It is delivered as a Claude Cowork plugin and installed from a Veeva-managed GitHub repository. Learn more about Veeva Clinical Data solutions, including EDC, DQS, and eCOA, at Veeva R&D and Quality Summit in Boston October 20-21. The event is open exclusively to life sciences industry professionals.

About Veeva Systems Veeva delivers the industry cloud for life sciences with applications, agents, data, and consulting. Committed to innovation, product excellence, and customer success, Veeva serves
