COMUNICATO STAMPA â?? CONTENUTO PROMOZIONALE

Sixth-generation underwater smartphone housing adds improved touch performance, broader phone compatibility and an expanded photography accessory system

ZHUHAI, China, Sept. 16, 2026 (GLOBE NEWSWIRE) â?? DIVEVOLK today announced the SeaTouch 6 Pro
, its patented full-touchscreen underwater smartphone housing. Rated IPX8 to 60m, it lets divers use the phoneâ??s native touchscreen to take photos and videos, switch lenses, run third-party apps, review footage, access GPS, and even make surface emergency calls.

The SeaTouch 6 Pro delivers six upgrades: a 6th-gen touchscreen membrane, included snorkelling red filter, desiccant pad slots, expanded phone compatibility, redesigned dome lens structure, and improved swipe-up gesture support. The new membrane boosts swipe endurance to 150,000 cycles while enhancing sensitivity and edge control.

Faster Setup and Improved Protection

Leaving behind the hassle of traditional setup, the housing seals without a vacuum pump. Its multi-layer sealing and buttonless structure reduce leak points, while aluminum-alloy frames reinforce the touchscreen and lens areas. The included red filter helps restore colors from 0 to 10 meters depth, while replaceable desiccant pads help prevent fogging.

Internal clearance has increased from 15 mm to 18 mm, supporting phones up to 180.0 Ã? 82.5 Ã? 11.2 mm and camera bumps up to 18 mm. This accommodates iPhone, even iPhone 18 series, and Android flagships from brands including Samsung, Huawei, Xiaomi, vivo, OPPO, Google and OnePlus.

Expanded Underwater Photography System

The redesigned dome mount allows DIVEVOLKâ??s second-generation AquaLock technology Dome Lens to cover all cameras. A modular mounting system also supports wet lenses, lights, brackets, filters and Bluetooth external shutter. GPS and cellular signals remain accessible at the surface for navigation, emergency calls and content sharing.

â??SeaTouch 6 Pro lets a phone work underwater much as it does on land,â?• said the DIVEVOLK Marketing & Communications team. â??The entire system has been redesigned for a simpler, more capable experience. It should be more than just a waterproof case â?? your smart dive companion.â?•
