Creators Can Now Unlock Next-Level Gimbal Features with Osmo FrameTap, ActiveTrack 8.0, and Apple DockKit

SHENZHEN, China, May 7, 2026 /PRNewswire/ - DJI, the global leader in civilian drones and creative camera technology, today introduces the Osmo Mobile 8P to the global market. Equipped with next-level framing and tracking features, creators can elevate their smartphone shots with precision. The new detachable Osmo FrameTap remote enables creators to shoot remote-controlled selfies with precise framing. Meanwhile, the upgraded ActiveTrack 8.0[1] delivers even more agile subject tracking to keep subjects in frame, even in complex crowds. Alternatively, creators can also connect their iPhones directly to the Osmo Mobile 8P for native tracking using Apple DockKit[1].

Precise Control in Your Hand

The new Osmo FrameTap allows creators to take a rear-camera selfie or direct a shot from a distance, ensuring professional results. This detachable remote features a screen that mirrors the view from a smartphone or the Osmo Mobile 8P's Multifunctional Module 2[1]. The intuitive joystick gives creators precise control of the gimbal's movement and zoom. Additionally, the brightness and temperature of the fill light on the Multifunctional Module 2 can be adjusted by eight levels. The magnetic design makes it easy to snap onto the gimbal's handle or be removed quickly.

Upgraded Tracking for Every Subject

The Osmo Mobile 8P offers multiple ways to keep subjects in frame. The new Multifunctional Module 2 pairs with the Osmo Mobile 8P to track more than just people and pets. It can also keep general objects, such as cars and landmarks, centered in the frame. Creators can also use ActiveTrack 8.0[1] through the DJI Mimo app. Bringing a new level of agility to subject tracking, creators can keep their subjects centered in crowded environments such as concerts or sporting events. It is especially effective in navigating around obstructions and handling fast shifts. Alternatively, iPhone creators can track subjects seamlessly through their native camera app, as the new Osmo Mobile 8P supports Apple

DockKit.

Integrated Design, Evolved Stabilization

The Osmo Mobile 8P's 3-axis gimbal leverages DJI's eighth-generation stabilization for dynamic shots and steady footage. Weighing approximately 386 g, it features a built-in tripod and a 215 mm extension rod. The tripod's design has been updated to open wider for enhanced stability on various surfaces. Built to last, it offers up to 10 hours[1] of operating time. The built-in USB-C port allows the gimbal to act as a phone charger, making it ideal for extended outdoor filming and live streaming.

Creative Modes for Cinematic Flair

The DJI Mimo app transforms everyday footage into professional-grade content through an array of intuitive cinematic modes that turn simple operations into striking visual effects.

Flexible Shooting Angles

The gimbal's 360° Infinite Spin enables a smooth panoramic capture from any angle through an unlimited horizontal rotation. Combined with intelligent tracking, it continuously locks onto moving subjects for seamless, professional-looking footage. Low-angle shots are also possible by tilting the pan axis forward, allowing creators to capture the world from a child's or pet's eye level.

Price and Availability

DJI Osmo Mobile 8P is available immediately from store.dji.com and authorized retail partners, with shipping starting today, in the following configurations:

DJI Care Refresh

DJI Care Refresh, the comprehensive protection plan for DJI products, is now available for Osmo Mobile 8P. Accidental damage is covered by the replacement service, including natural wear, collisions, and water damage. For a small additional charge, you can have your damaged product replaced if an accident occurs.

DJI Care Refresh (1-Year Plan) includes up to 2 replacements in 1 year. DJI Care Refresh (2-Year Plan) includes up to 4 replacements in 2 years. Other services offered by DJI Care Refresh include the official warranty, international warranty service, and free shipping. For a full list of details, please visit: <http://www.dji.com/support/service/djicare-refresh>
