

## Evolveum to Showcase AI-Driven Acceleration of IGA Application Onboarding at Gartner IAM Summit 2026

### Descrizione

COMUNICATO STAMPA - CONTENUTO PROMOZIONALE

BRATISLAVA, Slovakia, Feb. 19, 2026 /PRNewswire/ - Evolveum, the company behind midPoint, a leading open-source Identity Governance and Administration (IGA) platform, today announced that its Chief Product Officer, Pavol Mederly, will speak at the Gartner Identity & Access Management Summit, taking place in London on 9-10 March 2026, where Evolveum will also participate as a Silver Sponsor.

As traditional network boundaries dissolve, identity has emerged as the primary security control point for organizations. Attackers increasingly target credentials rather than infrastructure, making centralized visibility and automated access control over identities essential. By enforcing least-privilege access, and preventing entitlement creep, IGA helps reduce the attack surface and limit how far a breach can spread.

Mederly's session, "The Hidden Cost of Slow Application Onboarding in IGA", will take place on 10 March at 3:20 p.m. GMT and will focus on practical approaches to improving application onboarding, one of the most persistent challenges organizations face when deploying IGA programs.

"Application onboarding remains one of the biggest pain points and barriers to effective identity governance," said Mederly. "With midPilot, we are applying AI-assisted configuration frameworks that can significantly accelerate deployment, reduce risk exposure, and help organizations realize value much earlier. It can also lower the barrier for entry to small and mid-sized enterprises, who have traditionally been deterred by cost and complexity."

MidPilot, Evolveum's AI application onboarding assistant for midPoint, is designed to streamline configuration and guide implementation teams through complex onboarding scenarios, significantly shortening time-to-value while maintaining governance rigor.

At the summit, Evolveum will also demonstrate how midPoint supports automated identity lifecycle management and strengthens governance across complex identity environments.

## About Evolveum

Evolveum is an EU-based company behind midPoint, the leading open source complete IGA suite recognized by Gartner and KuppingerCole. MidPoint gives organizations control, visibility, and efficiency to reduce identity risk, simplify compliance, and modernize identity operations.

Trusted globally by a community of customers, partners and other midPoint enthusiasts, it delivers secure IGA with transparency, and professional support.

Building on this foundation, Evolveum is developing midPilot, an AI assistant that streamlines application onboarding, supported by the European Union's Next Generation EU program and Slovakia's Research and Innovation Authority (VAIA).
