

## InfiMotion Technology Makes Public Debut, Showcasing Full-Stack E&#224 Drive Capabilities at Wuxi Event

### Descrizione

COMUNICATO STAMPA &#224 CONTENUTO PROMOZIONALE

WUXI, China, July 23, 2026 /PRNewswire/ &#224 InfiMotion Technology (InfiMotion), a global innovator in intelligent e&#224 drive systems, hosted a technology showcase event in Wuxi on July 16, marking its first public appearance as an independent supplier to the global automotive industry. The event demonstrated the company&#224s end&#224to&#224end capabilities spanning global R&D, extreme validation, and micron&#224precision manufacturing &#224 solidifying its position as a rising force in the new&#224energy vehicle (NEV) drivetrain sector.

&#224Let the world know InfiMotion&#224 said Joe Lin, CEO of InfiMotion Technology. &#224We have spent years perfecting our e&#224 drive technology for leading global automakers, and we are now ready to stand on our own as a trusted partner for the wider market.&#224

#### Cloud-Synced Global R&D: Engineering Without Borders

InfiMotion&#224s R&D network spans Wuxi, Shanghai, Ningbo, Hangzhou, and Gothenburg, with over 1,000 engineers &#224 including a Swedish team of over 100 people &#224 collaborating in real time via the cloud. This global footprint is built around real-world extremes: high-load endurance on European autobahns, Nordic cold starts, and tropical full-load operation in Southeast Asia &#224 scenarios that directly shape InfiMotion&#224s globalization DNA.

#### A Track Record of Industry &#224Firsts&#224

InfiMotion&#224s technical pedigree speaks for itself:

The company has also pioneered Umini-pin winding, 0.2mm ultra-thin silicon steel laminations, embedded and three-level PCM technologies, and is leading the formulation of industry standards for amorphous alloy materials.

#### Tested to the Extreme &#224 Certified for Global Trust

InfiMotion adheres to ASPICE Level 3 processes and ASIL-D (ISO 26262) certification. Its validation system includes temperature cycling from -60Â°C to 140Â°C, 1,500-hour salt-spray tests, and 2,500-hour comprehensive endurance runs â?? with over 9,000 individual test items required for one European premium brand. The companyâ??s CNAS-accredited testing center houses the worldâ??s first 30,000 rpm motor test bench.

### Manufacturing at Micron-Level Precision

InfiMotion operates five smart manufacturing bases across China (Wuxi, Hangzhou, Ningbo, Quzhou, and Jiaxing), with motor line automation reaching 95%. SMT accuracy is held to  $\pm 25\mu\text{m}$ , measurement instruments resolve down to  $0.1\mu\text{m}$ , and an AI-driven visual inspection system detects defects as small as  $20\mu\text{m}$ .

### From Wuxi to the World

Today, InfiMotion supplies e-drive systems across the full voltage spectrum (400Vâ??900V) for all vehicle classes, from A0 to supercars. Its global network spans China, Europe, and Malaysia, with vertical integration from key components to complete system. In the first half of 2026, the company ranked among Chinaâ??s top three suppliers for both motor and inverter shipments, with volume production already serving Geely, Volvo, and JLR.

### The InfiMotion Era Has Just Begun

As the global NEV industry undergoes profound transformation, InfiMotion remains committed to full-stack in-house R&D, global collaborative synergy, and open-win partnerships â?? delivering proven, traceable, and mass-producible Chinese e-drive solutions to the world.

### About InfiMotion Technology

InfiMotion Technology is a global leader in the R&D and manufacturing of advanced electric drive systems and components for new energy vehicles. Committed to innovation, performance, and sustainability, InfiMotion provides comprehensive solutions empowering automakers to create the next generation of efficient, powerful, and intelligent electric vehicles.
