COMUNICATO STAMPA - CONTENUTO PROMOZIONALE

ATHENS, Greece and LONDON, June 24, 2026 /PRNewswire/ - METLEN (LSE: MTLN) (RIC: MTLN.L) (Bloomberg: MTLN.LN) (Athens: MTLN) (RIC: MTLNr.AT) (Bloomberg: MTLN.GA) (ADR: MYTHY US) inaugurated today the new M Technologies production unit in Volos, marking a significant upgrade for Greece's defence industry, a sector of national and European strategic importance.

In the presence of members of the Greek Government and senior representatives of the international defence industry, METLEN confirms that Greece can play the role of a production partner in the new European defence value chains, leveraging its industrial depth, expertise and international credibility.

In Volos, METLEN is developing a modern, vertically integrated defence industrial ecosystem, drawing on 25 years of expertise, reliability and operational efficiency. The M Technologies Hub is now evolving into a fully integrated production complex, unique in Greece, comprising six units across a total area of 100,000 sq.m., with capabilities in raw materials processing, manufacturing, assembly and support for complex defence applications.

In his speech, METLEN Executive Chairman Evangelos Mytilineos underlined the strategic importance of a strong Greek defence industry in safeguarding national sovereignty and contributing to European security and autonomy: "For us, today is not simply the inauguration of another industrial unit, another factory. It is part of a defence-industrial ecosystem that will be distinguished not only by its performance in global markets but will also form part of the company's expanding contribution to strengthening our country's defence capabilities. We live in an era in which security is returning to the core of the economy and politics, as global balances are shifting at a speed that would have been difficult to foresee only a few years ago. Geopolitical developments, new challenges and the reconfiguration of international alliances have created a new context in which countries, economies and societies are required to redefine their priorities. Greece, Europe and the entire world are facing a

historic challenge. We must be more prepared, more self-sufficient and more capable of protecting our interests in an environment where traditional certainties have diminished.â?•

The start of full production at the fourth unit of METLENâ??s defence arm complex confirms the pace of implementation of the plan presented at the companyâ??s Capital Markets Day in London in April 2025. At the same time, METLENâ??s defence footprint is further strengthened, and the domestic defence industrial base is reinforced.
